HR Policy Association Awards a Badge of Excellence to Talview

HR Policy Recruiting Software Initiative Review Board Identifies Innovators in the Field of Human Resources Automation and Software Solutions

Washington, D.C. – The HR Policy Association, the leading organization representing over 380 Chief Human Resources Officers at the largest corporations in the United States, is pleased to announce that its Recruiting Software Initiative (RSI) has awarded Talview with a Badge of Excellence for Returns.

Talent acquisition leaders from nearly 20 HR Policy member companies assembled at the beginning of 2018 to create the RSI Review Board to identify innovators whose products and services deserve consideration by Chief Human Resource Officers of large corporations. The Review Board is currently evaluating companies offering solutions to enhance a company’s ability to attract, assess, hire and retain top talent.

The Review Board does not promote any one software solution over another. Instead, they assess each solution through distinct lenses related to the application’s ability to adapt, mitigate unconscious bias, comply with labor regulations, exhibit successful integrations, justify outcomes, and demonstrate returns directly correlated to the vendor’s platform.

Badges of Excellence are awarded to recruiting solutions assessed by the RSI Review Board and are awarded to those that demonstrated innovative approaches to improving the ability of employers to identify, attract, evaluate and retain critically important talent.

For receiving a Badge of Excellence for Returns, the RSI Review Board felt Talview showcased strong and proven results among current clients that were correlated to using their platform.

###

HR Policy Association is the lead organization representing Chief Human Resource Officers at major employers. The Association consists of over 380 of the largest corporations doing business in the United States and globally, and these employers are represented in the organization by their most senior human resource executive. Collectively, their companies employ more than 10 million employees in the United States, over nine percent of the private sector workforce, and 20 million employees worldwide. They have a combined market capitalization of more than $8 trillion. These senior corporate officers participate in the Association because of their commitment to improving the direction of human resource policy. Their objective is to use the combined power of the membership to act as a positive influence to better public policy, the HR marketplace, and the human resource profession.
